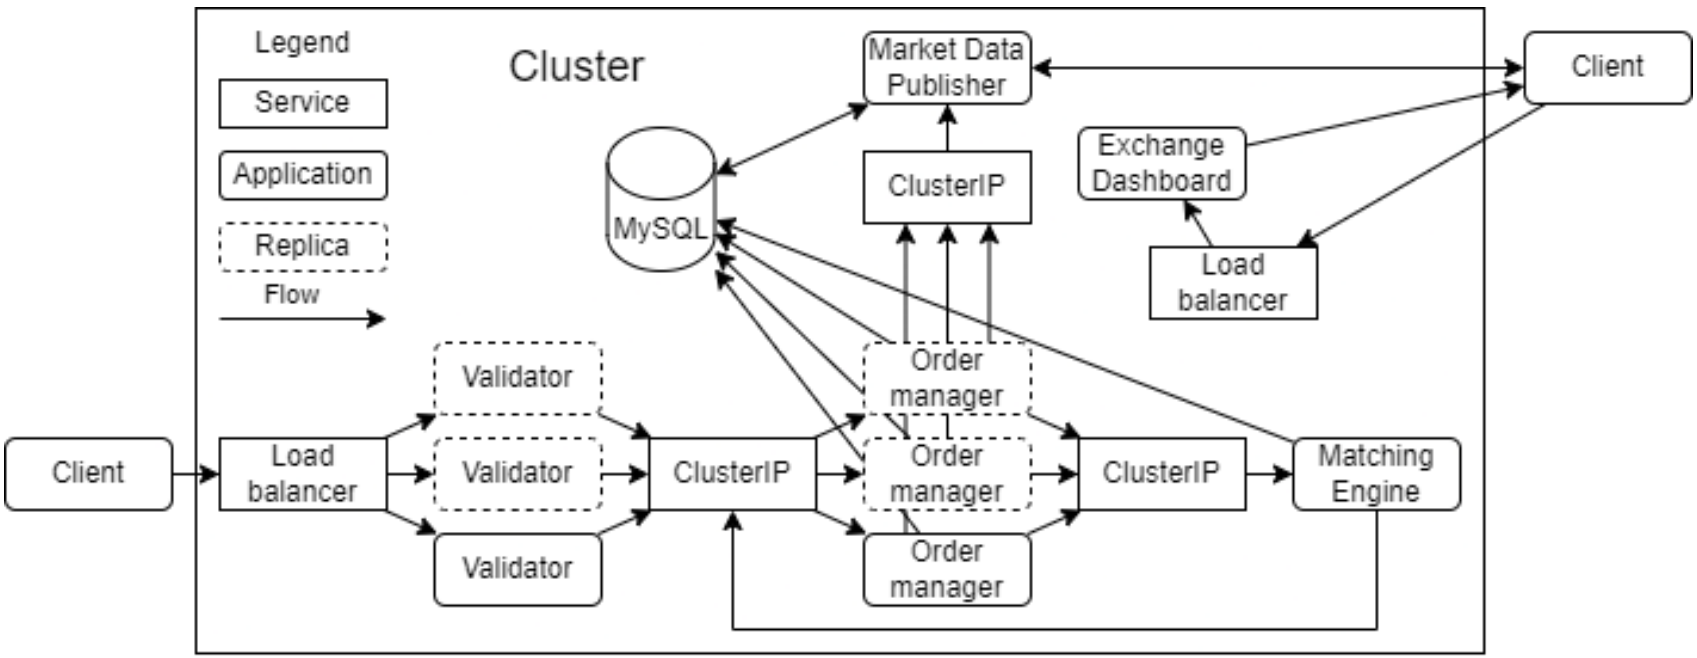
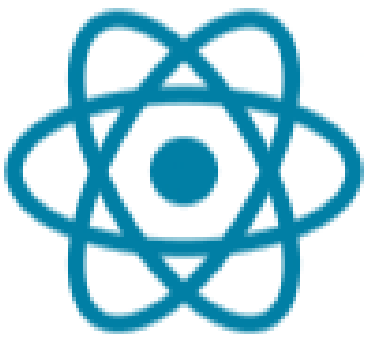
# ARCHITECTURE



# TECHNOLOGIES AND LIBRARIES USED

fluent-json-schema



# VALIDATOR

- Uses fluent-json-schema to pre-validate incoming requests
- Forwards validated requests to Order Manager rejects otherwise

# ORDER MANAGER

- Uses mysql2/promise to store orders
- Forwards orders to Market Data Publisher and Matching Machine
- Forwards executions to Market Data Publisher

# MATCHING ENGINE

- Stores open orders locally
- Processes orders using Rxjs
- Finds matches
- Updates remaining quantity in orders (MySQL)
- Sends reduced executions to Order Manager

# MARKET DATA PUBLISHER

- Uses Socket.IO to connect to clients
- Uses Rxjs to process orders and executions
- Forwards orders and executions to clients subscribed to a symbol
- Can read from database to send current data to a client
- Computes average price each minute

# EXCHANGE DASHBOARD

- React application
- Uses React's virtual DOM to update UI
- Uses a react port of chart.js to display graphs
- Uses Socket.IO to subscribe to a symbol and handle events
- Can correct local data if it becomes inconsistent
